Get the latest information on Injections and Infusions!

Hospitals have long struggled under complicated guidelines for coding injection and infusion services. But those days are over.

Now, using a simple coding decision tree as your guide, you can master coding for these common procedures without having to master complex coding guidelines.

The ***Injections and Infusions Coding Toolkit*** was developed by the staff at **The University of Texas MD Anderson Cancer Center**, a high-volume and world-renowned cancer treatment facility in Houston, TX. They designed a tool that makes it easy for staff to capture correct codes at point-of-service or for coders to use to assign appropriate codes to bill.

The toolkit takes the guesswork out of:

- Selecting the initial service
- Deciding which codes can be reported in combination with other codes

Your toolkit includes everything you need to get started today, including:

- 5 copies of the color-coded, laminated coding decision tree
- 5 copies of pocket-sized 'cheat sheets' to help identify frequently used codes
- A CD-ROM with the coding tree files you can customize for your facility
- A PDF training guide and a PowerPoint training presentation
