Mechanisms in Homogeneous and Heterogeneous Epoxidation Catalysis

Mechanisms in Homogeneous and Heterogeneous Epoxidation Catalysis

The catalytic epoxidation of olefins plays an important role in the industrial production of several commodity compounds, as well as in the synthesis of many intermediates, fine chemicals, and pharmaceuticals. The scale of production ranges from millions of tons per year to a few grams per year. The diversity of catalysts is large and encompasses all the known categories of catalyst type: homogeneous, heterogeneous, and biological. This book summarizes the current status in these fields concentrating on rates, kinetics, and reaction mechanisms, but also covers broad topics including modeling, computational simulation, process concepts, spectroscopy and new catalyst development. The similarities and distinctions between the different reaction systems are compared, and the latest advances are described.

- * Comprehensive listing of epoxide products
- * Broad comparison of turnover frequencies of homogeneous, heterogeneous, main-group, biomimetic and biological catalysts
- * Analysis of the general strengths and weaknesses of varied catalytic systems
- * Detailed description of the mechanisms of reaction for classical and emerging catalysts

From reader reviews:

Hannelore Evans:

Why don't make it to become your habit? Right now, try to prepare your time to do the important take action, like looking for your favorite reserve and reading a e-book. Beside you can solve your long lasting problem; you can add your knowledge by the publication entitled Mechanisms in Homogeneous and Heterogeneous Epoxidation Catalysis. Try to face the book Mechanisms in Homogeneous and Heterogeneous Epoxidation Catalysis as your friend. It means that it can to be your friend when you truly feel alone and beside regarding course make you smarter than previously. Yeah, it is very fortunated for you. The book makes you considerably more confidence because you can know almost everything by the book. So , we should make new experience as well as knowledge with this book.

Mary Crist:

This book untitled Mechanisms in Homogeneous and Heterogeneous Epoxidation Catalysis to be one of several books which best seller in this year, this is because when you read this guide you can get a lot of benefit upon it. You will easily to buy this book in the book retail store or you can order it via online. The publisher in this book sells the e-book too. It makes you quicker to read this book, since you can read this book in your Smart phone. So there is no reason to you to past this reserve from your list.

Patricia Ramirez:

Reading a reserve tends to be new life style in this era globalization. With studying you can get a lot of information that may give you benefit in your life. Using book everyone in this world can easily share their idea. Guides can also inspire a lot of people. A lot of author can inspire all their reader with their story or maybe their experience. Not only situation that share in the books. But also they write about the ability about something that you need illustration. How to get the good score toefl, or how to teach your children, there are many kinds of book that you can get now. The authors nowadays always try to improve their expertise in writing, they also doing some study before they write to their book. One of them is this Mechanisms in Homogeneous and Heterogeneous Epoxidation Catalysis.

Peter Lombard:

Your reading 6th sense will not betray you, why because this Mechanisms in Homogeneous and Heterogeneous Epoxidation Catalysis book written by well-known writer who really knows well how to make book that may be understand by anyone who all read the book. Written with good manner for you, dripping every ideas and producing skill only for eliminate your hunger then you still question Mechanisms in Homogeneous and Heterogeneous Epoxidation Catalysis as good book not just by the cover but also by the content. This is one e-book that can break don't judge book by its include, so do you still needing a different sixth sense to pick this particular!? Oh come on your reading through sixth sense already told you so why you have to listening to an additional sixth sense.
