Autonomous Intelligent Vehicles: Theory, Algorithms, and Implementation (Advances in Computer Vision and Pattern Recognition) Hong Cheng

This important text/reference presents state-of-the-art research on intelligent vehicles, covering not only topics of object/obstacle detection and recognition, but also aspects of vehicle motion control. With an emphasis on both high-level concepts, and practical detail, the text links theory, algorithms, and issues of hardware and software implementation in intelligent vehicle research. Topics and features: presents a thorough introduction to the development and latest progress in intelligent vehicle research, and proposes a basic framework; provides detection and tracking algorithms for structured and unstructured roads, as well as on-road vehicle detection and tracking algorithms using boosted Gabor features; discusses an approach for multiple sensor-based multiple-object tracking, in addition to an integrated DGPS/IMU positioning approach; examines a vehicle navigation approach using global views; introduces algorithms for lateral and longitudinal vehicle motion control.

From reader reviews:

Mary Kenney:

Do you one of people who can't read satisfying if the sentence chained from the straightway, hold on guys that aren't like that. This Autonomous Intelligent Vehicles: Theory, Algorithms, and Implementation (Advances in Computer Vision and Pattern Recognition) book is readable through you who hate the straight word style. You will find the details here are arrange for enjoyable looking at experience without leaving actually decrease the knowledge that want to provide to you. The writer of Autonomous Intelligent Vehicles: Theory, Algorithms, and Implementation (Advances in Computer Vision and Pattern Recognition) content conveys prospect easily to understand by a lot of people. The printed and e-book are not different in the written content but it just different by means of it. So , do you still thinking Autonomous Intelligent Vehicles: Theory, Algorithms, and Implementation (Advances in Computer Vision and Pattern Recognition) is not loveable to be your top record reading book?

Marlys Wieland:

Hey guys, do you really wants to finds a new book to read? May be the book with the title Autonomous Intelligent Vehicles: Theory, Algorithms, and Implementation (Advances in Computer Vision and Pattern Recognition) suitable to you? Typically the book was written by well known writer in this era. The actual book untitled Autonomous Intelligent Vehicles: Theory, Algorithms, and Implementation (Advances in Computer Vision and Pattern Recognition) is the main of several books that everyone read now. This specific book was inspired many people in the world. When you read this reserve you will enter the new shape that you ever know just before. The author explained their concept in the simple way, therefore all of people can easily to understand the core of this e-book. This book will give you a lots of information about this world now. How to get the good score toefl, or how to teach your children, there are many kinds of book which exist now. The authors these days always try to improve their expertise in writing, they also doing some analysis before they write with their book. One of them is this Autonomous Intelligent Vehicles: Theory, Algorithms, and Implementation (Advances in Computer Vision and Pattern Recognition).

Cherry Simard:

The reason why? Because this Autonomous Intelligent Vehicles: Theory, Algorithms, and Implementation

(Advances in Computer Vision and Pattern Recognition) is an unordinary book that the inside of the guide waiting for you to snap the idea but latter it will zap you with the secret that inside. Reading this book next to it was fantastic author who also write the book in such wonderful way makes the content interior easier to understand, entertaining way but still convey the meaning totally.
