The Chemistry of Nonaqueous Solvents V4: Solution Phenomena and Aprotic Solvents: v. 4 J J Lagowski

The Chemistry of Nonaqueous Solvents, Volume IV: Solution Phenomena and Aprotic Solvents focuses on the chemistry of nonaqueous solvents, with emphasis on solution phenomena and aprotic solvents such as tetramethylurea, inorganic acid chlorides, cyclic carbonates, and sulfolane.

This book is organized into seven chapters and begins with an overview of the theory of electrical conductivity and elementary experimental considerations, along with some of the interesting research on nonaqueous solvents. It then turns to a discussion on hydrogen bonding phenomena in nonaqueous systems as probed by four spectroscopic techniques; the different methods used in studying redox systems in nonaqueous solvents such as potentiometry and steady state diffusion methods; and the use of tetramethylurea as a nonaqueous medium for chemical reactions and chemical investigations. The reader is also introduced to inorganic acid chlorides of high dielectric constant, with special reference to antimony trichloride, and preparation methods for cyclic carbonates including vinylene carbonate, ethylene carbonate, propylene carbonate, and butylene carbonate. The book concludes with a chapter on sulfolane, focusing on its preparation and purification, physical properties, and toxicology.

This book will be of interest to chemists who want to know more about nonaqueous solvents.

From reader reviews:

Harold Graham:

Have you spare time for any day? What do you do when you have a lot more or little spare time? Yep, you can choose the suitable activity to get spend your time. Any person spent their particular spare time to take a walk, shopping, or went to the Mall. How about open or even read a book eligible The Chemistry of Nonaqueous Solvents V4: Solution Phenomena and Aprotic Solvents: v. 4? Maybe it is for being best activity for you. You already know beside you can spend your time with the favorite's book, you can cleverer than before. Do you agree with it has the opinion or you have additional opinion?

Catherine Poppe:

What do you concentrate on book? It is just for students as they are still students or that for all people in the world, exactly what the best subject for that? Only you can be answered for that problem above. Every person has different personality and hobby for every other. Don't to be compelled someone or something that they don't want do that. You must know how great along with important the book The Chemistry of Nonaqueous Solvents V4: Solution Phenomena and Aprotic Solvents: v. 4. All type of book is it possible to see on many resources. You can look for the internet methods or other social media.

Phyllis Tucker:

Precisely why? Because this The Chemistry of Nonaqueous Solvents V4: Solution Phenomena and Aprotic Solvents: v. 4 is an unordinary book that the inside of the publication waiting for you to snap this but latter it will distress you with the secret that inside. Reading this book next to it was fantastic author who else write the book in such awesome way makes the content inside of easier to understand, entertaining technique but still convey the meaning completely. So , it is good for you because of not hesitating having this any more or you going to regret it. This phenomenal book will give you a lot of gains than the other book possess such as help improving your proficiency and your critical thinking way. So , still want to hold up having that book? If I ended up you I will go to the e-book store hurriedly.

Ella Straw:

That publication can make you to feel relax. This particular book The Chemistry of Nonaqueous Solvents V4: Solution Phenomena and Aprotic Solvents: v. 4 was colourful and of course has pictures on the website. As we know that book The Chemistry of Nonaqueous Solvents V4: Solution Phenomena and Aprotic Solvents: v. 4 has many kinds or style. Start from kids until adolescents. For example Naruto or Private investigator Conan you can read and think you are the character on there. So , not at all of book are generally make you bored, any it can make you feel happy, fun and rest. Try to choose the best book to suit your needs and try to like reading that.
