Stability of Tropical Rainforest Margins (Environmental Science and Engineering) Teja Tscharntke, Christoph Leuschner, Manfred Zeller, Edi Guhardja, Arifuddin Bidin

Tropical rainforests disappear at an alarming rate causing unprecedented losses in biodiversity and ecosystem services. The stability of rainforest margins has an ecological and socio-economic dimension, and understanding the multidisciplinary nature of land-use changes in tropical rainforest margins is the key to identifying development objectives such as mitigation of biodiversity loss and poverty reduction. The chapters in this book cover a broad range of topical research areas, from impacts of different forest-use intensities, sustainable management of agroforestry to integrated land-use concepts.
