The Coming Shortage of Surgeons: Why They Are Disappearing and What That Means for Our Health is the only quantitative analysis of the workforce in orthopedic and thoracic surgery, otolaryngology, obstetrics and gynecology, general surgery, neurosurgery, and urology. It analyzes the demand and supply for these surgeons and gives the causes and remedies for these shortages.

The Coming Shortage of Surgeons quantifies the demand for the surgical workforce, then examines the constraints to supply, which include soaring tuition and medical students' debts, the demand for a controllable or scheduled lifestyle, malpractice premium expenses, early retirement, and perhaps the most difficult hurdle to overcome: the provision in the Balanced Budget Act of 1997 that caps all medical and surgical residencies at 1996 levels.
