Post-Genomic Cardiology

José Marín-García

Post-Genomic Cardiology José Marín-García

In this second edition of *Post-Genomic Cardiology*, developing and new technologies such as translational genomics, next generation sequencing (NGS), bioinformatics, and systems biology in molecular cardiology are assessed in light of their therapeutic potential. As new methods of mutation screening emerge, both for the genome and for the “epigenome,” comprehensive understanding of the many mutations that underlie cardiovascular diseases and adverse drug reactions is within our reach.

This book, written by respected cardiologist José Marín-García, features discussion on the Hap-Map: the largest international effort to date aiming to define the differences between our individual genomes. This unique reference further reviews and investigates genome sequences from our evolutionary relatives that could help us decipher the signals of genes, and offers a comprehensive and critical evaluation of regulatory elements from the complicated network of the background DNA.

- Offers updated discussion of cutting-edge molecular techniques including new genomic sequencing / NGS / Hap-Map / bioinformatics / systems biology approaches
- Analyzes mitochondria dynamics and their role in cardiac dysfunction, up-to-date analysis of cardio-protection, and cardio-metabolic syndrome
- Presents recent translational studies, gene therapy, transplantation of stem cells, and pharmacological treatments in CVDs

From reader reviews:

Anthony Green:

The publication untitled Post-Genomic Cardiology is the publication that recommended to you you just read. You can see the quality of the book content that will be shown to you. The language that writer use to explained their ideas are easily to understand. The article writer was did a lot of investigation when write the book, so the information that they share to your account is absolutely accurate. You also will get the e-book of Post-Genomic Cardiology from the publisher to make you more enjoy free time.

Jeff Williams:

Typically the book Post-Genomic Cardiology has a lot details on it. So when you read this book you can get a lot of help. The book was written by the very famous author. This articles author makes some research prior to write this book. This kind of book very easy to read you will get the point easily after reading this book.

Betty Bowers:

Do you have something that you want such as book? The book lovers usually prefer to pick book like comic, quick story and the biggest you are novel. Now, why not seeking Post-Genomic Cardiology that give your satisfaction preference will be satisfied through reading this book. Reading routine all over the world can be said as the opportunity for people to know world far better then how they react when it comes to the world. It can't be stated constantly that reading behavior only for the geeky particular person but for all of you who wants to be success person. So , for all you who want to start examining as your good habit, it is possible to pick Post-Genomic Cardiology become your current starter.

Charline Bynum:

That book can make you to feel relax. This specific book Post-Genomic Cardiology was bright colored and of course has pictures on there. As we know that book Post-Genomic Cardiology has many kinds or genre. Start from kids until youngsters. For example Naruto or Investigator Conan you can read and think you are the character on there. Therefore , not at all of book usually are make you bored, any it can make you feel happy, fun and unwind. Try to choose the best book for yourself and try to like reading that will.
