Human and Automatic Speaker Recognition over Telecommunication Channels (T-Labs Series in Telecommunication Services) Laura Fernández Gallardo

This work addresses the evaluation of the human and the automatic speaker recognition performances under different channel distortions caused by bandwidth limitation, codecs, and electro-acoustic user interfaces, among other impairments. Its main contribution is the demonstration of the benefits of communication channels of extended bandwidth, together with an insight into how speaker-specific characteristics of speech are preserved through different transmissions. It provides sufficient motivation for considering speaker recognition as a criterion for the migration from narrowband to enhanced bandwidths, such as wideband and super-wideband.

From reader reviews:

Andre Roberts:

In this 21st one hundred year, people become competitive in every way. By being competitive right now, people have to do something to make these people survive, being in the middle of the actual crowded place and notice simply by surrounding. One thing that occasionally many people have underestimated the idea for a while is reading. Yes, by reading a book your ability to survive is then having a chance to stand that other is high. To suit your needs who want to start reading any book, we give you this particular Human and Automatic Speaker Recognition over Telecommunication Channels (T-Labs Series in Telecommunication Services) book as a basic and daily reading reserve. Why, because this book is usually more than just a book.

Loyd Tyler:

Reading a book can be one of a lot of action that everyone in the world enjoys. Do you like reading a book therefore. There are a lot of reasons why people love it. First, reading a publication will give you a lot of new data. When you read a guide you will get new information mainly because a book is one of a number of ways to share the information or maybe their idea. Second, studying a book will make you actually more imaginative. When you examine a book especially fictional works, the author will bring you to imagine the story how the figures do it anything. Third, you may share your knowledge with others. When you read this Human and Automatic Speaker Recognition over Telecommunication Channels (T-Labs Series in Telecommunication Services), you may tell your family, friends and also soon about your reserve. Your knowledge can inspire different ones, make them read a book.

Margaret Thompson:

The actual book Human and Automatic Speaker Recognition over Telecommunication Channels (T-Labs Series in Telecommunication Services) has a lot of information on it. So when you make sure to read this book you can get a lot of gain. The book was written by the very famous author. The writer makes some research previous to write this book. This kind of book is very easy to read; you can obtain the point easily after reading this article book.

Donna Willeford:

In this particular era, which is the greater man or woman or who has the ability to do something more are more important than others. Do you want to become one of them? It is just a simple way to have that. What you are related to is just spending your time not much but quite enough to experience a look at some books. One of many books in the top collection in your reading list is usually Human and Automatic Speaker Recognition over Telecommunication Channels (T-Labs Series in Telecommunication Services). This book, which is qualified as The Hungry Mountains, can get you closer in turning out to be a precious person. By looking right up and reviewing this book you can get many advantages.
