Learning RStudio for R Statistical Computing Mark van der Loo, Edwin de Jonge

In Detail

Data is coming at us faster, dirtier, and at an ever increasing rate. The necessity to handle many, complex statistical analysis projects is hitting statisticians and analysts across the globe. This book will show you how to deal with it like never before, thus providing an edge and improving productivity.

"Learning RStudio for R Statistical Computing" will teach you how to quickly and efficiently create and manage statistical analysis projects, import data, develop R scripts, and generate reports and graphics. R developers will learn about package development, coding principles, and version control with RStudio.

This book will help you to learn and understand RStudio features to effectively perform statistical analysis and reporting, code editing, and R development.

The book starts with a quick introduction where you will learn to load data, perform simple analysis, plot a graph, and generate automatic reports. You will then be able to explore the available features for effective coding, graphical analysis, R project management, report generation, and even project management.

"Learning RStudio for R Statistical Computing" is stuffed with feature-rich and easy-to-understand examples, through step-by-step instructions helping you to quickly master the most popular IDE for R development.

Approach

A practical tutorial covering how to leverage RStudio functionality to effectively perform R Development, analysis, and reporting with RStudio.

Who this book is for

The book is aimed at R developers and analysts who wish to do R statistical development while taking advantage of RStudio functionality to ease their development efforts. Familiarity with R is assumed. Those who want to get started with R development using RStudio will also find the book useful. Even if you already use R but want to create reproducible statistical analysis projects or extend R with self-written packages, this book shows how to quickly achieve this using RStudio.

From reader reviews:

Kevin Pinkney:

What do you about book? It is not important along? Or just adding material if you want something to explain what you problem? How about your free time? Or are you busy man or woman? If you don't have spare time to perform others business, it is make you feel bored faster. And you have spare time? What did you do? Everybody has many questions above. The doctor has to answer that question because just their can do which. It said that about reserve. Book is familiar in each person. Yes, it is proper. Because start from on guardería until university need this particular Learning RStudio for R Statistical Computing to read.

James Soltero:

People live in this new day time of lifestyle always attempt to and must have the free time or they will get large amount of stress from both daily life and work. So , once we ask do people have free time, we will say absolutely sure. People is human not really a robot. Then we consult again, what kind of activity do you possess when the spare time coming to you of course your answer can unlimited right. Then do you ever try this one, reading ebooks. It can be your alternative in spending your spare time, the book you have read is actually Learning RStudio for R Statistical Computing.

Donald Chapin:

Do you have something that you prefer such as book? The guide lovers usually prefer to decide on book like comic, limited story and the biggest some may be novel. Now, why not striving Learning RStudio for R Statistical Computing that give your enjoyment preference will be satisfied through reading this book. Reading routine all over the world can be said as the opportunity for people to know world a great deal better then how they react toward the world. It can't be explained constantly that reading habit only for the geeky person but for all of you who wants to always be success person. So , for all you who want to start examining as your good habit, you can pick Learning RStudio for R Statistical Computing become your starter.

Jennifer Joseph:

Reading a guide make you to get more knowledge from this. You can take knowledge and information from the book. Book is published or printed or outlined from each source which filled update of news. In this modern era like right now, many ways to get information are available for anyone. From media social just like newspaper, magazines, science reserve, encyclopedia, reference book, book and comic. You can add your understanding by that book. Are you hip to spend your spare time to open your book? Or just looking for the Learning RStudio for R Statistical Computing when you essential it?
