Convergence of Knowledge, Technology and Society: Beyond Convergence of Nano-Bio-Info-Cognitive Technologies (Science Policy Reports)

Convergence of Knowledge, Technology and Society: Beyond Convergence of Nano-Bio-Info-Cognitive Technologies (Science Policy Reports)

This volume aims to document the most important worldwide accomplishments in converging knowledge and technology, including converging platforms, methods of convergence, societal implications, and governance in the last ten years. Convergence in knowledge, technology, and society is the accelerating, transformative interaction among seemingly distinct scientific disciplines, technologies, and communities to achieve mutual compatibility, synergism, and integration, and through this process to create added value for societal benefit. It is a movement that is recognized by scientists and thought leaders around the world as having the potential to provide far-reaching solutions to many of today's complex knowledge, technology, and human development challenges. Four essential and interdependent convergence platforms of human activity are defined in the first part of this report: nanotechnology-biotechnology-information technology and cognitive science ("NBIC") foundational tools; Earth-scale environmental systems; human-scale activities; and convergence methods for societal-scale activities. The report then presents the main implications of convergence for human physical potential, cognition and communication, productivity and societal outcomes, education and physical infrastructure, sustainability, and innovative and responsible governance. As a whole, the report presents a new model for convergence. To effectively take advantage of this potential, a proactive governance approach is suggested. The study identifies an international opportunity to develop and apply convergence for technological, economic, environmental, and societal benefits. The panel also suggests an opportunity in the United States for implementing a program aimed at focusing disparate R and D energies into a coherent activity - a "Societal Convergence Initiative". This study received input from leading academic, industry, government, and NGO experts from the United States, Latin America, Europe, Asia, and Australia.

From reader reviews:

Micah Stahlman:

Book is actually written, printed, or created for everything. You can know everything you want by a guide. Book has a different type. As we know that book is important point to bring us around the world. Close to that you can your reading ability was fluently. A guide Convergence of Knowledge, Technology and Society: Beyond Convergence of Nano-Bio-Info-Cognitive Technologies (Science Policy Reports) will make you to become smarter. You can feel a lot more confidence if you can know about every little thing. But some of you think that open or reading a new book make you bored. It is not make you fun. Why they might be thought like that? Have you trying to find best book or appropriate book with you?

Mary Gines:

Convergence of Knowledge, Technology and Society: Beyond Convergence of Nano-Bio-Info-Cognitive Technologies (Science Policy Reports) can be one of your basic books that are good idea. Most of us recommend that straight away because this reserve has good vocabulary that will increase your knowledge in language, easy to understand, bit entertaining but delivering the information. The author giving his/her effort that will put every word into pleasure arrangement in writing Convergence of Knowledge, Technology and Society: Beyond Convergence of Nano-Bio-Info-Cognitive Technologies (Science Policy Reports) although doesn't forget the main position, giving the reader the hottest and based confirm resource info that maybe you can be one among it. This great information can drawn you into brand new stage of crucial thinking.

Robert Kuehner:

This Convergence of Knowledge, Technology and Society: Beyond Convergence of Nano-Bio-Info-Cognitive Technologies (Science Policy Reports) is completely new way for you who has attention to look for some information as it relief your hunger associated with. Getting deeper you upon it getting knowledge more you know or else you who still having little digest in reading this Convergence of Knowledge, Technology and Society: Beyond Convergence of Nano-Bio-Info-Cognitive Technologies (Science Policy Reports) can be the light food for you because the information inside this particular book is easy to get by means of anyone. These books produce itself in the form which is reachable by anyone, yes I mean in the e-book type. People who think that in book form make them feel tired even dizzy this e-book is the answer. So there isn't any in reading a book especially this one. You can find what you are looking for. It should be here for you. So , don't miss it! Just read this e-book style for your better life and knowledge.

Margaret Coleman:

Within this era which is the greater individual or who has ability to do something more are more important than other. Do you want to become one of it? It is just simple method to have that. What you should do is just spending your time not very much but quite enough to experience a look at some books. On the list of books in the top record in your reading list is Convergence of Knowledge, Technology and Society: Beyond

Convergence of Nano-Bio-Info-Cognitive Technologies (Science Policy Reports). This book that is certainly qualified as The Hungry Inclines can get you closer in turning out to be precious person. By looking upward and review this guide you can get many advantages.
