In Detail

JavaServer Faces (JSF) is a leading framework and core component of Java Platform Enterprise Edition. JSF is the standard Java EE technology used to build web user interfaces. JSF 2.2 is a recent release with an extensive list of new features, some of which have been expected for a long time and are now ready to be implemented.

Starting out with a very basic topic, Expression Language, you will continue onwards covering a wide range of JSF sectors, such as JSF communication, JSF scopes, and so on. Throughout the book, you will master JSF artifacts (AJAX, HTML5, configurations, renders, handlers, listeners, events, factories, tabular data, custom components, Facelets, and so on) in a compendium of programming practices and informative examples.

You then round off with a detailed discussion on the capabilities of Facelets. Overall, this book helps you gain knowledge on the latest JSF features in an interesting and original approach. Adding these skills to your

personal arsenal will turn you into a veritable JSF master.
