Many Americans, holding fast to the American Dream and the promise of equal opportunity, claim that social class doesn't matter. Yet the ways we talk and dress, our interactions with authority figures, the degree of trust we place in strangers, our religious beliefs, our achievements, our senses of morality and of ourselves all are marked by social class, a powerful factor affecting every domain of life.

In *Facing Social Class*, social psychologists Susan Fiske and Hazel Rose Markus, and a team of sociologists, anthropologists, linguists, and legal scholars, examine the many ways we communicate our class position to others and how social class shapes our daily, face-to-face interactions from casual exchanges to interactions at school, work, and home.

*Facing Social Class* exposes the contradiction between the American ideal of equal opportunity and the harsh reality of growing inequality, and it shows how this tension is reflected in cultural ideas and values, institutional practices, everyday social interactions, and psychological tendencies. Contributor Joan Williams examines cultural differences between middle and working-class people and shows how the cultural gap between social class groups can influence everything from voting practices and political beliefs to work habits, home life, and social behaviors.

The United States has one of the highest levels of income inequality and one of the lowest levels of social mobility among industrialized nations, yet many Americans continue to buy into the myth that theirs is a classless society. *Facing Social Class* faces the reality of how social class operates in our daily lives, why it is so pervasive, and what can be done to alleviate its effects.
