Occupational Cancer Epidemiology (Recent Results in Cancer Research)

Occupational Cancer Epidemiology (Recent Results in Cancer Research)

The identification of occupational cancer risk factors and of carcinogens in the workplace is assuming increasing importance in cancer epidemiology. This book, which contains the proceedings of a symposium held in Vancouver in June 1988, combines overviews by experts on substantive topics and methodologic issues of broad interest in occupational cancer epidemiology. Among the former are state of the art reviews emphasizing recent data and new and innovative analytic approaches. The substantive topics include discussion of cancer risks from exposure to complex organic mixtures, asbestos and man-made fibers, herbicides, radon, and electromagnetic fields. Risk assessment, exposure assessment, and analysis of occupational cohort studies are examples of the methodologic issues addressed. This book provides basic information and opens perspectives on new areas of research. In organizing our symposium we were greatly assisted by Betty Fata and Kim Rust of Venue West Conference Ltd. We appreciate the financial support received from the following: Cancer Control Agency of British Columbia Alcan Aluminium Ltd. National Health Research & Development Program Workers' Compensation Board of British Columbia Purdue Frederick Inc. Rhone-Poulenc Pharma Inc. London Drugs Ltd. Ciba-Geigy Canada Ltd. Bristol-Myers Pharmaceutical Group Schering Canada Inc. Hoffmann-La Roche Ltd. Sterling Drug Ltd. Parke-Davis Canada Inc. Beecham Laboratories Pfizer Canada Inc. Roussel Canada Inc.
