Ecological Processes Handbook (Applied Ecology and Environmental Management)

Luca Palmeri, Alberto Barausse, Sven Erik Jorgensen

Ecological Processes Handbook (Applied Ecology and Environmental Management) Luca Palmeri, Alberto Barausse, Sven Erik Jorgensen

Ecology is a cross-disciplinary field involving many different aspects of science. Written with this in mind, this book introduces ecological processes, ranging from physical processes, to chemical processes and biological processes. It contains all the necessary information on an ecological process: a clear, detailed but not too lengthy definition; some practical examples, the main mathematical models which have been used to describe the process, and the key interconnections with other ecological processes that must be known in order to apply what has been learned from the book.
