Statistical Methods for Dynamic Treatment Regimes: Reinforcement Learning, Causal Inference, and Personalized Medicine: 76 (Statistics for Biology and Health)

Bibhas Chakraborty, Erica E.M. Moodie

Statistical Methods for Dynamic Treatment Regimes: Reinforcement Learning, Causal Inference, and Personalized Medicine: 76 (Statistics for Biology and Health) Bibhas Chakraborty, Erica E.M. Moodie

Statistical Methods for Dynamic Treatment Regimes shares state of the art of statistical methods developed to address questions of estimation and inference for dynamic treatment regimes, a branch of personalized medicine. This volume demonstrates these methods with their conceptual underpinnings and illustration through analysis of real and simulated data. These methods are immediately applicable to the practice of personalized medicine, which is a medical paradigm that emphasizes the systematic use of individual patient information to optimize patient health care. This is the first single source to provide an overview of methodology and results gathered from journals, proceedings, and technical reports with the goal of orienting researchers to the field. The first chapter establishes context for the statistical reader in the landscape of personalized medicine. Readers need only have familiarity with elementary calculus, linear algebra, and basic large-sample theory to use this text. Throughout the text, authors direct readers to available code or packages in different statistical languages to facilitate implementation. In cases where code does not already exist, the authors provide analytic approaches in sufficient detail that any researcher with knowledge of statistical programming could implement the methods from scratch. This will be an important volume for a wide range of researchers, including statisticians, epidemiologists, medical researchers, and machine learning researchers interested in medical applications. Advanced graduate students in statistics and biostatistics will also find material in *Statistical Methods for Dynamic Treatment Regimes* to be a critical part of their studies.

From reader reviews:

Travis Freeman:

The knowledge that you get from Statistical Methods for Dynamic Treatment Regimes: Reinforcement Learning, Causal Inference, and Personalized Medicine: 76 (Statistics for Biology and Health) is the more deep you looking the information that hide inside words the more you get interested in reading it. It does not mean that this book is hard to comprehend but Statistical Methods for Dynamic Treatment Regimes: Reinforcement Learning, Causal Inference, and Personalized Medicine: 76 (Statistics for Biology and Health) giving you joy feeling of reading. The writer conveys their point in specific way that can be understood by simply anyone who read the item because the author of this reserve is well-known enough. This specific book also makes your own vocabulary increase well. That makes it easy to understand then can go along with you, both in printed or e-book style are available. We highly recommend you for having this specific Statistical Methods for Dynamic Treatment Regimes: Reinforcement Learning, Causal Inference, and Personalized Medicine: 76 (Statistics for Biology and Health) instantly.

James Pickett:

People live in this new day time of lifestyle always make an effort to and must have the extra time or they will get lots of stress from both daily life and work. So , once we ask do people have extra time, we will say absolutely indeed. People is human not a robot. Then we consult again, what kind of activity do you possess when the spare time coming to a person of course your answer will probably unlimited right. Then ever try this one, reading textbooks. It can be your alternative with spending your spare time, the particular book you have read is usually Statistical Methods for Dynamic Treatment Regimes: Reinforcement Learning, Causal Inference, and Personalized Medicine: 76 (Statistics for Biology and Health).

Jordan Moore:

A lot of book has printed but it is unique. You can get it by online on social media. You can choose the top book for you, science, witty, novel, or whatever by simply searching from it. It is called of book Statistical Methods for Dynamic Treatment Regimes: Reinforcement Learning, Causal Inference, and Personalized Medicine: 76 (Statistics for Biology and Health). You can add your knowledge by it. Without leaving behind the printed book, it might add your knowledge and make you happier to read. It is most essential that, you must aware about book. It can bring you from one location to other place.

Cheryl Fisher:

Many people said that they feel uninterested when they reading a guide. They are directly felt that when they get a half parts of the book. You can choose the book Statistical Methods for Dynamic Treatment Regimes: Reinforcement Learning, Causal Inference, and Personalized Medicine: 76 (Statistics for Biology and Health) to make your own reading is interesting. Your current skill of reading proficiency is developing

when you similar to reading. Try to choose easy book to make you enjoy to see it and mingle the sensation about book and looking at especially. It is to be first opinion for you to like to open a book and read it. Beside that the publication Statistical Methods for Dynamic Treatment Regimes: Reinforcement Learning, Causal Inference, and Personalized Medicine: 76 (Statistics for Biology and Health) can to be your brand new friend when you're feel alone and confuse in doing what must you're doing of this time.
