How to Build a Bobber on a Budget (Motorbooks Workshop) Jose de Miguel

In the old days all a person needed to build a killer custom motorcycle was a bike, a set of tools, a little know-how, and a creative vision. But with the rise of the high-dollar, haute moteur Gucci choppers, the true custom bike has gotten out of most riders' reach, right?

Dead wrong. In this book Jose de Miguel, a custom builder from way back, sets out to prove that those good old days never ended. In the clearest and simplest terms, he shows readers how they can turn odds and ends found around the shop into one-off motorcycle parts--and make a cheap, run-of-the mill custom build into a drop-dead show stopper. Following de Miguel's lead, along with his straightforward illustrations, any resourceful owner with rudimentary mechanical skills, a basic tool kit, and--most importantly--a modicum of imagination can build the bobber of his dreams for less than the price of a new bike.
