Internet Environments for Science Education Marcia C. Linn

Internet Environments for Science Education synthesizes 25 years of research to identify effective, technology-enhanced ways to convert students into lifelong science learners--one inquiry project at a time. It offers design principles for development of innovations; features tested, customizable inquiry projects that students, teachers, and professional developers can enact and refine; and introduces new methods and assessments to investigate the impact of technology on inquiry learning.

The methodology--**design-based research studies**--enables investigators to capture the impact of innovations in the complex, inertia-laden educational enterprise and to use these findings to improve the innovation.

The approach--**technology-enhanced inquiry**--takes advantage of global, networked information resources, sociocognitive research, and advances in technology combined in responsive learning environments.

Internet Environments for Science Education advocates leveraging inquiry and technology to reform the full spectrum of science education activities--including instruction, curriculum, policy, professional development, and assessment. The book offers:

- *the **knowledge integration perspective on learning**, featuring the interpretive, cultural, and deliberate natures of the learner;
- *the **scaffolded knowledge integration framework on instruction** summarized in meta-principles and pragmatic principles for design of inquiry instruction;
- *a series of **learning environments**, including the Computer as Learning Partner (CLP), the Knowledge Integration Environment (KIE), and the Web-based Inquiry Science Environment (WISE) that designers can use to create new inquiry projects, customize existing projects, or inspire thinking about other learning environments;
- ***curriculum design patterns for inquiry projects** describing activity sequences to promote critique, debate, design, and investigation in science;
- *a **partnership model** establishing activity structures for teachers, pedagogical researchers, discipline experts, and technologists to jointly design and refine inquiry instruction;
- *a **professional development model** involving mentoring by an expert teacher;
- *projects about **contemporary controversy** enabling students to explore the nature of science;
- *a **customization process** guiding teachers to adapt inquiry projects to their own students, geographical characteristics, curriculum framework, and personal goals; and
- *a **Web site** providing additional links, resources, and community tools at **www.InternetScienceEducation.org**

From reader reviews:

Wesley Powell:

Book is definitely written, printed, or created for everything. You can know everything you want by a e-book. Book has a different type. As we know that book is important point to bring us around the world. Close to that you can your reading skill was fluently. A book Internet Environments for Science Education will make you to be smarter. You can feel considerably more confidence if you can know about every thing. But some of you think in which open or reading any book make you bored. It isn't make you fun. Why they could be thought like that? Have you in search of best book or ideal book with you?

Rick Briones:

Often the book Internet Environments for Science Education will bring you to definitely the new experience of reading a new book. The author style to explain the idea is very unique. When you try to find new book to study, this book very suited to you. The book Internet Environments for Science Education is much recommended to you you just read. You can also get the e-book in the official web site, so you can quicker to read the book.

Jose Crawford:

Reading can called mind hangout, why? Because when you find yourself reading a book specifically book entitled Internet Environments for Science Education your thoughts will drift away trough every dimension, wandering in each aspect that maybe unfamiliar for but surely will become your mind friends. Imaging every single word written in a publication then become one form conclusion and explanation that will maybe you never get previous to. The Internet Environments for Science Education giving you a different experience more than blown away your mind but also giving you useful info for your better life with this era. So now let us explain to you the relaxing pattern here is your body and mind are going to be pleased when you are finished examining it, like winning an activity. Do you want to try this extraordinary paying spare time activity?

Joseph Mattos:

Some individuals said that they feel uninterested when they reading a e-book. They are directly felt it when they get a half areas of the book. You can choose the book Internet Environments for Science Education to make your current reading is interesting. Your own skill of reading talent is developing when you similar to reading. Try to choose straightforward book to make you enjoy you just read it and mingle the impression about book and studying especially. It is to be first opinion for you to like to available a book and examine it. Beside that the guide Internet Environments for Science Education can to be your friend when you're feel alone and confuse with the information must you're doing of these time.
