Distributed Network Data Alasdair Allan, Kipp Bradford

Build your own distributed sensor network to collect, analyze, and visualize real-time data about our human environment—including noise level, temperature, and people flow. With this hands-on book, you'll learn how to turn your project idea into working hardware, using the easy-to-learn Arduino microcontroller and off-the-shelf sensors.

Authors Alasdair Allan and Kipp Bradford walk you through the entire process, from prototyping a simple sensor node to performing real-time analysis on data captured by a deployed multi-sensor network. Demonstrated at recent O'Reilly Strata Conferences, the future of distributed data is already here. If you have programming experience, you can get started immediately.

- Wire up a circuit on a breadboard, and use the Arduino to read values from a sensor
- Add a microphone and infrared motion detector to your circuit
- Move from breadboard to prototype with Fritzing, a program that converts your circuit design into a graphical representation
- Simplify your design: learn use cases and limitations for using Arduino pins for power and grounding
- Build wireless networks with XBee radios and request data from multiple sensor platforms
- Visualize data from your sensor network with Processing or LabVIEW

From reader reviews:

Richard Poston:

Do you have favorite book? In case you have, what is your favorite's book? E-book is very important thing for us to understand everything in the world. Each publication has different aim or maybe goal; it means that reserve has different type. Some people really feel enjoy to spend their time and energy to read a book. They are reading whatever they take because their hobby will be reading a book. What about the person who don't like examining a book? Sometime, man feel need book when they found difficult problem or exercise. Well, probably you'll have this Distributed Network Data.

Randell Easley:

Book is written, printed, or highlighted for everything. You can know everything you want by a guide. Book has a different type. As you may know that book is important point to bring us around the world. Close to that you can your reading skill was fluently. A book Distributed Network Data will make you to become smarter. You can feel much more confidence if you can know about every little thing. But some of you think that open or reading a book make you bored. It is not make you fun. Why they may be thought like that? Have you in search of best book or acceptable book with you?

Barbra Poole:

Reading a reserve can be one of a lot of pastime that everyone in the world likes. Do you like reading book therefore. There are a lot of reasons why people like it. First reading a book will give you a lot of new data. When you read a publication you will get new information mainly because book is one of several ways to share the information or their idea. Second, examining a book will make you actually more imaginative. When you reading a book especially hype book the author will bring one to imagine the story how the figures do it anything. Third, you can share your knowledge to other individuals. When you read this Distributed Network Data, you may tells your family, friends along with soon about yours e-book. Your knowledge can inspire the others, make them reading a publication.

Hilton Rogers:

It is possible to spend your free time to learn this book this guide. This Distributed Network Data is simple to develop you can read it in the park your car, in the beach, train along with soon. If you did not possess much space to bring the printed book, you can buy often the e-book. It is make you simpler to read it. You can save the actual book in your smart phone. So there are a lot of benefits that you will get when you buy this book.
