Magnolia (Medicinal and Aromatic Plants - Industrial Profiles) Yuji Maruyama

The genus *Magnolia* consists of several medicinally important species most of which come from Far East Asia. Many species of this genus have traditionally been used to treat various illnesses from simple headaches to complicated cancer, and because of their versatility have more recently been incorporated into commercially successful medicine preparations. In recent years studies have resulted in the isolation of a number of bioactive compounds and discovery of new biological and pharmacological activities. This book deals with many aspects of the genus *Magnolia* detailing areas such as phytochemistry, pharmacology, toxicology, quality control, and commercial significance.
