RealWorld Evaluation: Working Under Budget, Time, Data, and Political Constraints J. (John) Michael Bamberger, Jim Rugh, Linda S. Mabry

This book addresses the challenges of conducting program evaluations in real-world contexts where evaluators and the agencies face budget and time constraints and where critical data is missing. The book is organized around a seven-step model developed by the authors, which has been tested and refined in workshops. Vignettes and case studies—representing evaluations from a variety of geographic regions and sectors—demonstrate adaptive possibilities for small projects with budgets of a few thousand dollars to large-scale, long-term evaluations. The text incorporates quantitative, qualitative, and mixed-method designs and this **Second Edition** reflects important developments in the field over the last five years.
