Chaotic Dynamics and Transport in Classical and Quantum Systems: 182 (Nato Science Series II: (closed)) Pierre Collet, M. Courbage, S. Métens, A. Neishtadt, G. Zaslavsky

This book offers a modern updated review on the most important activities in today dynamical systems and statistical mechanics by some of the best experts in the domain. It gives a contemporary and pedagogical view on theories of classical and quantum chaos and complexity in hamiltonian and ergodic systems and their applications to anomalous transport in fluids, plasmas, oceans and atom-optic devices and to control of chaotic transport. The book is issued from lecture notes of the International Summer School on 'Chaotic Dynamics and Transport in Classical and Quantum Systems' held in Cargèse (Corsica) 18th to the 30th August 2003. It reflects the spirit of the School to provide lectures at the post-doctoral level on basic concepts and tools. The first part concerns ergodicity and mixing, complexity and entropy functions, SRB measures, fractal dimensions and bifurcations in hamiltonian systems. Then, models of dynamical evolutions of transport processes in classical and quantum systems have been largely explained. The second part concerns transport in fluids, plasmas and reacting media. On the other hand, new experiments of cold optically trapped atoms and electrodynamics cavity have been thoroughly presented. Finally, several papers bear on synchronism and control of chaos. The target audience of the proceedings are physicists, mathematicians and all scientists involved in Chaos and Dynamical Systems Theory and their fundamental applications in Physics and in the Science of Complex and Nonlinear phenomena.

From reader reviews:

Marcos Gorman:

This Chaotic Dynamics and Transport in Classical and Quantum Systems: 182 (Nato Science Series II: (closed)) book is not really ordinary book, you have it then the world is in your hands. The benefit you have by reading this book will be information inside this book incredible fresh, you will get information which is getting deeper an individual read a lot of information you will get. That Chaotic Dynamics and Transport in Classical and Quantum Systems: 182 (Nato Science Series II: (closed)) without we know teach the one who examining it become critical in pondering and analyzing. Don't possibly be worry Chaotic Dynamics and Transport in Classical and Quantum Systems: 182 (Nato Science Series II: (closed)) can bring once you are and not make your handbag space or bookshelves' turn out to be full because you can have it within your lovely laptop even telephone. This Chaotic Dynamics and Transport in Classical and Quantum Systems: 182 (Nato Science Series II: (closed)) having fine arrangement in word in addition to layout, so you will not truly feel uninterested in reading.

Bonnie Boyd:

The particular book Chaotic Dynamics and Transport in Classical and Quantum Systems: 182 (Nato Science Series II: (closed)) will bring someone to the new experience of reading a new book. The author style to explain the idea is very unique. Should you try to find new book to learn, this book very appropriate to you. The book Chaotic Dynamics and Transport in Classical and Quantum Systems: 182 (Nato Science Series II: (closed)) is much recommended to you to see. You can also get the e-book from official web site, so you can quicker to read the book.

Victor Parisi:

Reading can called thoughts hangout, why? Because while you are reading a book especially book entitled Chaotic Dynamics and Transport in Classical and Quantum Systems: 182 (Nato Science Series II: (closed)) your mind will drift away trough every dimension, wandering in every single aspect that maybe mysterious for but surely will become your mind friends. Imaging each word written in a guide then become one web form conclusion and explanation in which maybe you never get previous to. The Chaotic Dynamics and Transport in Classical and Quantum Systems: 182 (Nato Science Series II: (closed)) giving you a different experience more than blown away your head but also giving you useful info for your better life on this era. So now let us demonstrate the relaxing pattern this is your body and mind will probably be pleased when you are finished examining it, like winning a casino game. Do you want to try this extraordinary wasting spare time activity?

Frank Moore:

Do you like reading a reserve? Confuse to looking for your selected book? Or your book was rare? Why so

many question for the book? But just about any people feel that they enjoy to get reading. Some people likes looking at, not only science book but additionally novel and Chaotic Dynamics and Transport in Classical and Quantum Systems: 182 (Nato Science Series II: (closed)) as well as others sources were given know-how for you. After you know how the truly amazing a book, you feel would like to read more and more. Science reserve was created for teacher as well as students especially. Those books are helping them to bring their knowledge. In various other case, beside science reserve, any other book likes Chaotic Dynamics and Transport in Classical and Quantum Systems: 182 (Nato Science Series II: (closed)) to make your spare time considerably more colorful. Many types of book like here.
