Valerii V. Fedorov, Sergei L. Leonov

Optimal Design for Nonlinear Response Models (Chapman & Hall/CRC Biostatistics Series) Valerii V. Fedorov, Sergei L. Leonov

Optimal Design for Nonlinear Response Models discusses the theory and applications of model-based experimental design with a strong emphasis on biopharmaceutical studies. The book draws on the authors' many years of experience in academia and the pharmaceutical industry.

While the focus is on nonlinear models, the book begins with an explanation of the key ideas, using linear models as examples. Applying the linearization in the parameter space, it then covers nonlinear models and locally optimal designs as well as minimax, optimal on average, and Bayesian designs. The authors also discuss adaptive designs, focusing on procedures with non-informative stopping.

The common goals of experimental design—such as reducing costs, supporting efficient decision making, and gaining maximum information under various constraints—are often the same across diverse applied areas. Ethical and regulatory aspects play a much more prominent role in biological, medical, and pharmaceutical research. The authors address all of these issues through many examples in the book.

From reader reviews:

Priscilla McCreary:

The book Optimal Design for Nonlinear Response Models (Chapman & Hall/CRC Biostatistics Series) give you a sense of feeling enjoy for your spare time. You can use to make your capable considerably more increase. Book can for being your best friend when you getting tension or having big problem using your subject. If you can make reading a book Optimal Design for Nonlinear Response Models (Chapman & Hall/CRC Biostatistics Series) for being your habit, you can get far more advantages, like add your current capable, increase your knowledge about a number of or all subjects. It is possible to know everything if you like available and read a guide Optimal Design for Nonlinear Response Models (Chapman & Hall/CRC Biostatistics Series). Kinds of book are a lot of. It means that, science e-book or encyclopedia or some others. So , how do you think about this publication?

Timothy Brown:

Book is to be different per grade. Book for children till adult are different content. To be sure that book is very important for all of us. The book Optimal Design for Nonlinear Response Models (Chapman & Hall/CRC Biostatistics Series) seemed to be making you to know about other know-how and of course you can take more information. It is quite advantages for you. The guide Optimal Design for Nonlinear Response Models (Chapman & Hall/CRC Biostatistics Series) is not only giving you a lot more new information but also to become your friend when you truly feel bored. You can spend your personal spend time to read your e-book. Try to make relationship using the book Optimal Design for Nonlinear Response Models (Chapman & Hall/CRC Biostatistics Series). You never feel lose out for everything should you read some books.

Lavonne Yates:

The book Optimal Design for Nonlinear Response Models (Chapman & Hall/CRC Biostatistics Series) has a lot info on it. So when you check out this book you can get a lot of gain. The book was written by the very famous author. Mcdougal makes some research before write this book. This specific book very easy to read you can get the point easily after scanning this book.

James Fitzpatrick:

Do you have something that you prefer such as book? The publication lovers usually prefer to select book like comic, short story and the biggest some may be novel. Now, why not attempting Optimal Design for Nonlinear Response Models (Chapman & Hall/CRC Biostatistics Series) that give your enjoyment preference will be satisfied by simply reading this book. Reading habit all over the world can be said as the way for people to know world much better then how they react to the world. It can't be said constantly that reading practice only for the geeky person but for all of you who wants to become success person. So , for all you who want to start studying as your good habit, you are able to pick Optimal Design for Nonlinear Response Models (Chapman & Hall/CRC Biostatistics Series) become your current starter.
