The Simple Science of Flight: From Insects to Jumbo Jets (MIT Press) Henk Tennekes

From the smallest gnat to the largest aircraft, all things that fly obey the same aerodynamic principles. In *The Simple Science of Flight*, Henk Tennekes investigates just how machines and creatures fly: what size wings they need, how much energy is required for their journeys, how they cross deserts and oceans, how they take off, climb, and soar. Fascinated by the similarities between nature and technology, Tennekes offers an introduction to flight that teaches by association. Swans and Boeings differ in numerous ways, but they follow the same aerodynamic principles. Biological evolution and its technical counterpart exhibit exciting parallels. What makes some airplanes successful and others misfits? Why does the Boeing 747 endure but the Concorde now seem a fluke? Tennekes explains the science of flight through comparisons, examples, equations, and anecdotes. The new edition of this popular book has been thoroughly revised and much expanded. Highlights of the new material include a description of the incredible performance of bar-tailed godwits (7,000 miles nonstop from Alaska to New Zealand), an analysis of the convergence of modern jetliners (from both Boeing and Airbus), a discussion of the metabolization of energy featuring Lance Armstrong, a novel treatment of the aerodynamics of drag and trailing vortices, and an emphasis throughout on evolution, in nature and in engineering. Tennekes draws on new evidence on bird migration, new wind-tunnel studies, and data on new airliners. And his analysis of the relative efficiency of planes, trains, and automobiles is newly relevant. (On a cost-per-seat scale, a 747 is more efficient than a passenger car.)

From reader reviews:

John Sanchez:

Within other case, little individuals like to read book The Simple Science of Flight: From Insects to Jumbo Jets (MIT Press). You can choose the best book if you want reading a book. Given that we know about how is important a book The Simple Science of Flight: From Insects to Jumbo Jets (MIT Press). You can add know-how and of course you can around the world by way of a book. Absolutely right, because from book you can realize everything! From your country till foreign or abroad you will be known. About simple matter until wonderful thing you are able to know that. In this era, we could open a book as well as searching by internet product. It is called e-book. You should use it when you feel fed up to go to the library. Let's examine.

Dennis Simpson:

Playing with family inside a park, coming to see the marine world or hanging out with good friends is thing that usually you will have done when you have spare time, then why you don't try matter that really opposite from that. 1 activity that make you not sensation tired but still relaxing, trilling like on roller coaster you already been ride on and with addition details. Even you love The Simple Science of Flight: From Insects to Jumbo Jets (MIT Press), you can enjoy both. It is fine combination right, you still wish to miss it? What kind of hangout type is it? Oh occur its mind hangout people. What? Still don't obtain it, oh come on its identified as reading friends.

David Gehrke:

The Simple Science of Flight: From Insects to Jumbo Jets (MIT Press) can be one of your beginning books that are good idea. All of us recommend that straight away because this book has good vocabulary that can increase your knowledge in vocabulary, easy to understand, bit entertaining but nevertheless delivering the information. The writer giving his/her effort that will put every word into delight arrangement in writing The Simple Science of Flight: From Insects to Jumbo Jets (MIT Press) yet doesn't forget the main level, giving the reader the hottest and also based confirm resource info that maybe you can be certainly one of it. This great information may drawn you into brand new stage of crucial thinking.

Anthony Bankston:

What is your hobby? Have you heard this question when you got college students? We believe that that question was given by teacher on their students. Many kinds of hobby, All people has different hobby. So you know that little person including reading or as reading through become their hobby. You must know that reading is very important in addition to book as to be the point. Book is important thing to incorporate you knowledge, except your teacher or lecturer. You will find good news or update regarding something by book. Different categories of books that can you choose to adopt be your object. One of them is The Simple Science of Flight: From Insects to Jumbo Jets (MIT Press).
